

TEMPLATE AND METHOD FOR APPLYING MAKEUP TO EYEBROWS

ABSTRACT OF THE DISCLOSURE

An eyebrow template can be used to apply makeup to a person's eyebrows. The template has a saddle that is shaped to be placed against the bridge of the person's nose. The template also has a pair of guides each attached to the saddle and each having a guide opening for guiding the application of makeup to the person's eyebrows. After placing the saddle against the bridge of the person's nose the templates are adjusted to outline the person's eyebrows. Then makeup is applied to the person's eyebrows using the templates to guide the makeup application.
